## Fossil Fool Bulletin delayed

**Dear Subscribers,**

**Fossil Fool Bulletin is unable to publish this week, due to the editor having health problems.**

**No, it's not the VIRUS.**

**I regret this, as it's never been more important to keep our eyes on the fossil fools, who are running the government's 'virus recovery' economic plan. With their hands out for environmental de-regulation, subsidies, tax cuts and slashing employment conditions for their workers.**

**FFB is always watching, and will resume publication as soon as possible.**

**With apologies,**

**Eve Sinton**
